

Fourth Grade

Dear Fourth Grade Parents,

We are so excited about our upcoming Fourth Grade Mother's Day Tea happening on Friday, May

11th in the hall from 11:00-12:00. Please join us for tea and a performance as we honor Mother Mary and all our beautiful mothers!! If you would like to bring a treat or tea to share that would be greatly appreciated!!!

We are on the home stretch- the last quarter of fourth grade. I'm working hard to get all my fourth graders prepared for fifth grade. We will be finishing our novel The Ballad of Lucy Whipple, and writing an essay as our final book project. This month will be all about fractions in **math**. In **science** we will continue our study of Earth and Space science. In **religion**

we will begin our four week family life program all about the importance of family and the role a fourth grader has in his/her own family. In **social studies** we will be discussing California history from 1870 through the 1920's and the vital role farming has on our economy.

Our Apple Valley simulation program will begin mid-May followed by an ice-cream social and graduation on Thursday, June 7th in our classroom backyard from 1:00-1:30- all are welcome to attend. During this three week program we will transform our classroom into a one-room schoolhouse from the 1850's- students will be learning what life was like back then and creating projects to earn Apple Valley points!!!

It's such a pleasure being part of such a wonderful group of students. Thank you for making this a great year- and thank you for all your generous contributions and donations to our classroom throughout the year.

With Much Gratitude,

Mrs. Flores
